The 1917 Granite
The Granite
Nineteen Hundred Seventeen

The Junior Annual
of the
New Hampshire College

Volume VIII

Published by the Class of
Nineteen Hundred Seventeen
Durham, New Hampshire
MDCCCLXVII
To Willard James Fisher

Whose calm, well-ordered, and efficient life of service has been a source of inspiration to all who knew him, the class of 1917 gratefully dedicates this book.
ILLARD JAMES FISHER was born in 1867 in Waterford, N. Y., the first child of George Fisher and Ellen Hunter Wright. His parents lived in Troy, in Albany, and, after his father had become a priest of the Episcopal church, in Stockport, N. Y. The pastorate there lasted eighteen years, and the eight brothers and sisters grew up together in the Hudson valley to the time when school and college had to be thought of.

Rev. George Fisher at first built up a Parish School, for the children of his parishioners and neighbors. Then he sent his two older sons to Williston Seminary, in Easthampton, Mass., where the oldest graduated in 1888. He entered Amherst College in the Class of 1892, was made a member of Phi Beta Kappa, and graduated with a record of interest in mathematics and science.

For most of the time for eleven years he was principal of the High School in Medway, Mass., where he graduated eight classes; though he also served a year as assistant in the Biological Laboratory of Amherst College, and studied another year in Cornell University. In 1903 he buried the lady whom he had long courted and for a short time called his wife. An assistantship being open in the Physics Department of Cornell University, he was glad to go there, to teach and study for an advanced degree. For his thesis he studied the subject of the temperature coefficients of gas viscosity, and showed by a series of experiments that the law known as Sutherland's expresses correctly the relation between viscosity and temperature through a range of temperature two hundred degrees higher than had been studied accurately before.

In 1908 he received the degree of Ph.D., and the same summer sailed for Europe, where he spent two semesters in the German University of Göttingen, with some travel and sight-seeing in Germany and Switzerland.

After three more years he was called to his present position of Professor of Physics in New Hampshire College, where his kindly nature, his ability and his energetic interest in all college activities have endeared him to the entire student body.

He has been made a member of Sigma Xi and of the American Physical Society; and a Fellow of the A.A.A.S.
Foreword

Once more a class of New Hampshire College has endeavored to produce an annual that will be an accurate and entertaining history of student and college activities; and yet be characteristic of the Class of 1917, so that, when time and circumstance have scattered us far and wide, this Granite will ever serve to bring us nearer to our Alma Mater, and to keep bright the friendships and associations that make the four years here mean so much to men and women of New Hampshire College. May it merit your praise and not deserve too much censure.

History of the Class of 1916

For four years the Class of 1916 has striven mightily to win for itself an honored name in the annals of New Hampshire College. The spirit of class loyalty, the desire to make good, which sprang into existence the night of the minstrel show when the victorious Freshmen showed their mettle, were indicative of the closer bonds which have strengthened and deepened as we pursued our way.

The rope pull and the class picture were also 1916 victories, but fate was against us in the Freshman-Sophomore football game. Our class was well represented on the athletic teams. Victories and defeats fell to our lot and all were taken in good spirit.

When the Class of 1917 appeared we found a foeman truly worthy of our steel. Valiantly we labored that they might be trained in the way they should go and our efforts proved not unfruitful. The rope pull was theirs and the football game a tie, but 1916 only entered more enthusiastically into the fray.

In every college activity our class has taken a prominent part. The Glee Club, the Orchestra, the Dramatic Club and all the other organizations number members of 1916 among their leaders.

Our friendships have been tried and proven—our loyalty unquestioned. We have done our best for our college. Other classes may accomplish more, but none will desire more strongly a bright, successful future for our Alma Mater than will the Class of 1916.

The Song of '17

1ST TO the song of '17, of the youths and maidens who gathered
Over one hundred strong, on one bright morning in Autumn.
Green were they, but determined to get the most out of college.
Their very first night here in Durham a minstrel show they attended;
Performed they with ardor and grace, to amuse the Sophomores fiendish.
A poster fight, next on the program, they engaged in until the dawn brightened.
A few days later the rope pull brought them revenge on the Soph'mores;
Seventeen won the day, and pulled the Sophs thro the river!
So, too, with the class picture, the Freshmen outwitted the Soph'mores,
Went to Dover one morning, returning again as the victors.
So the year sped away, with alternate sunshine and shadow,
Until very soon we were Sophs, with Freshmen who discipline needed.
We won the rope-pull from them, and thus for the first time in history
Both rope pulls were won by one class, and that class brave 1917!
Now that we Juniors are, we have left childish pastimes behind us;
Think we of weightier things, of Junior proms, for example.
We have been busy indeed, but thro the three years that are over
And all thro the years to come, old New Hampshire is first above all things
In the hearts of all of the class—our class of 1917.
The Juniors

THOMAS RICHARD ANDERTON, "Tom"  Dover High  Electrical Engineering
“He hath a lean and hungry look”
Tom has been with us the same time that the rest have, but he's so long himself that it seems longer. In fact, one of his fellow-graffers in the signal platoon was heard to say once that Tom always reminded him of going away—"so long." Cheer up, Tom, if it wasn't for you the Jit would fail up.
Corporal Signal Platoon (3).

GOLDIE BASCH, “Goldie”  Ashuelot
Winchester High  Arts and Science
“I am never merry when I hear sweet music”
When Goldie came to N. H. C. from the pastoral valley of Ashuelot, she was as innocent and credulous a little Freshman as you ever saw, but a year of college life made her so suspicious that she had only one remark for every occasion—"I don't believe it! I bet you're kidding me!"
Fortunately, Goldie lost none of her originality in the process of sophistication. Her conversational style hasn't changed a bit—it still has the spontaneity of an O. Henry story. But unless you favor Germany, you'd better be careful how you mention the European situation, for Goldie doesn't like to discuss the war with "people that are prejudiced."

Upton High, Mass.  Arts and Science
Rass is a sly coon. He dodged the dogs for a year but finally got chased up a "Bee" tree, and has been treed ever since. Batch's chief joys in life are his horse, his fiddle, and Billie Grove's courses. He spends most of his spare time in kidding Bill into thinking that he does not get his share of the honey. If it wasn't for the letters Batch writes to us in the summer vacations, we'd think from his life here that he was an awful innocent guy.

FRANK POWERS BENNETT, “Yank”     Haverhill
Haverhill High, Carnegie Institute

Chemical Engineering

“It’s wuth it”

Yank found Carnegie too slow and so he came back to New Hampshire. Here his knowledge of “Hops” procured for him the position of marshal at the Sophomore festivities. Frank saw Vernon Castle do a new Fox Trot while in New York this summer, and he is now giving exhibitions for Bud’s benefit. Bud hasn’t decided to take lessons yet, but he is thinking seriously of—but what does Yank care. He says Columbia is near Garden City and the water isn’t so rusty there.

PHYLLIS MARY BLANCHARD, “Phil”     Epping
Epping High

Arts and Science

“My mind to me a kingdom is”

Phyllis is the kind you often read about in books, but seldom meet in real life. She can discuss a profound philosophical subject in a way that shows more than ordinary insight, and with equal fervor can dramatically relate the adventures of Ignatz and Krazy. She has always been interested in nature, and last year specialized in Groves, but now has devoted all her energies to the study of psychology. We look for big things from Phyllis in this career, because personality and intellect like hers are bound to carry their possessor into the front ranks of life.

Arts and Science

“Then fill me with the old familiar juice, methinks I might recover by and by”

One bright morning in September, there dropped into the calm and peaceful community of Durham a disciple of “God’s Country.” Jug immediately began to make it known that he was around. His room in “The Cockroach Institute” was made the headquarters of the uninitiated and the ignorant; and many a social gathering, not sanctioned by the Y. M. C. A., took place there. In his Sophomore year Jug tried to forget that his interest in “Bunnies” was all in vain. Now Jug has adopted the pure and simple life and the height of his ambition is to shine in the Military Department.

LEROY ARTHUR BOUTWELL, “Bout” Concord Hopkinton High Mechanical Engineering

Bout’s first step to prominence was as the star rough-house of Rand’s Frat; now Bout gets his notoriety as the only guy that ever learned anything in Pat Cahill’s forge shop classes. That he’ll never be able live down, though he tries to explain it by saying that he had forge shop before he came here. Well, perhaps he had; he knew an awful lot of forge shop.

GLADYS ALICE BROWN, “Gladyx” Franklin Whitefield High Arts and Science

“Gentle of speech, beneficent of mind”

Gladyx entered N. H. C. with the Class of 1918, but she pestered the faculty until they gave her credit for her year’s work at the Boston Training School, and she is now a full-fledged Junior. Welcome, “Gladyx.” This is the way she divides her time:

Worrying about flunking, ⅔; Studying, ⅓; College activities, ⅔; Friendship, ⅓.

The first item on the schedule has never worked out properly, for no matter how hard she worries, she never manages to flunk. This is a constant source of surprise to Gladys. Her system for friendship seems to have been the most efficient of all, for hers in the sympathetic nature that makes many friends, and never loses them.

ARTHUR SAMUEL BURLEIGH Ossipee High Electrical Engineering

For the last two years this adopted son of Charlie Wentworth has been assistant traffic manager for the Busted and Mangled Railroad at Durham Junction. Burleigh thinks he’s a wireless shark, but he and Nelson have it fixed up so that one sends messages to the other who claims he’s receiving from Honolulu or the Eiffel Tower or Dover or some such faraway place.

Louise Elizabeth Burpee, “Buppie”  Manchester
Manchester High School    Home Economics

“We have been friends together
In sunshine and in shade”

If you’re looking for data on Manchester, ask Louise—she’s absolute authority, for she keeps up to the minute by frequent trips home, and by diligent perusing of the Daily Mirror and American. For two years Louise and Henrietta have been inseparable companions, all the girls will tell you there is no more faithful friend than Louise Burpee. “Preparedness” is her motto, and she always finds time to prepare each lesson without missing any good times.

Sumner “Landry” Carlisle, “Sum”  Exeter
Exeter High    Agricultural

“Up Exeter,” wishing to get a little experience in social ways before attempting to dazzle the co-eds, attended a function at Dover. The next morning one of the young ladies present was heard to ask, “Was last night the first time that Carlisle was ever out in society?”

A splendid politician and promoter and originator of the famous “bag of salt” joke, ex-laundryman, etc., etc., he has sufficient experience to enable him to round out an honorable and illustrious career.

Henry Benson Caswell, “Hooky”  Strafford
Austin Cate Academy    Mechanic Arts

Hooky doesn’t do or say much around college, for he is only happy when he is playing (?) in the band or driving “her” car. Marion is nice, we think, to trust him with one whole car. They say he can drive it one-handed, too. We don’t see what a normal man with two hands wants to drive a car one-handed for, but we suppose Hooky knows what he’s doing.

"But there's nothing half so sweet in life
As love's young dream"

As a Freshman Chasey had no more than arrived at New Hampshire when she found herself in a whirl of social activities. At Glee Club, in dramatics and at informals and house-parties, Chasey was always there, and with the same one twice? "Hardly ever." But this all ended when Charlie carried her off in his little Ford, and made her forget the man she left behind her. When there is a discussion of love in psych. class, Chasey discourses in words of wisdom gathered from her varied experiences, but Charlie shines brightest in an analysis of jealousy. Fortunately, Chasey takes no offense at our remarks for good nature is one of her characteristics.

RACHEL CLARENDA COLBY New Boston High Home Economics

"A good companion and as firm a friend"

Rachel is the optimist of the Class of '17, and although practical jokes are her delight, she laughs just as heartily when the joke is on her. Underneath all her fun, however, is a determination to be square, and a consideration for others which makes her an ideal friend. That Rachel has a capacity for hard work, too, is evinced by the fact that she frequently indulges in the desire to do her housework long after the rest of the dorm is fast asleep.

"When I beheld this I sighed, and said within my­self: 'Surely mortal man is a broom-stick.'"—(Swift)

In the fall of 1913 "Slats" jarred across Durham's boundary line, labeled as a man with "something to him," and speaking in terms of length, not a one has disputed it. Admired by the co-eds, boss of THE GRANITE, pride of The New Hampshire, and Secretary of Pat Cahill's Union, this 75 inches of wit, wisdom and wickedness can be recognized anywhere, for—

He is a laddie,
A bony, bony laddie,
He's as thin as the paper on the wall.
He's as light as a feather
And his knees they knock together,
And he is just as bright as he is tall.

"Swans sing before they die, 'twere no bad thing
Did certain persons die before they sing"

Take a look at this fellow and you will have to admit that he is a regular guy. His one failing is that he is an engineer. Like all true engineers, he specializes in Dover 55, and Boston 56, gets his associates to write up his reports, and then claims that he has a full schedule. He fails to say what it is full of, but from his Mexican disposition we can guess at that. His greatest accomplishment is the captaincy of the Ditch-Diggers Bowling Team. His only regret is that he rooms with a Sod Buster and an Arts and Sewing Circle man.

“I surrender all”  

Rochester undoubtedly surrendered a genius when it turned “Cliffie” loose in this cruel world.  
“Cliffie” first surrendered, along with many others, to the Engineering Course, but later surrendered to the Mechanic Arts.  
As far as we can learn “Cliffie” has yet to surrender to a co-ed. He stands strictly apart from the fairer sex, and claims that there is a reason.  
Generously surrendering high military honors to others, he joined the Band of Grafters, which event marked a decided decline in the efficiency of that organization. Although he never attempts to start an argument with any of the Profs., we still believe that “Cliffie” is getting his heart’s desire, “a real education.”

"Come on George! Cut the rough-housing"

"Rabbit" was a quiet little cuss until some one told him that he was the best looking lieutenant in the regiment. That was too much for him, and as he smashed baggage before coming to college, he thought perhaps he could smash hearts. Every evening he is to be seen at the Dean's dancing class. Rabbit's essential college activity is writing E. E. reports.

Nathaniel Edwin Robinson, "Nat"  
Pembroke  
Pembroke Academy  
Mechanic Arts

Nat, our Ballard Hall coal passer—the boy with the buxom cheeks and false teeth: the third of the Robinson episodes. Nat is very popular with the Ballard Hall neophytes, for he freely offers his assistance on wash-day. Our fair co-eds look upon him as a bashful, unsophisticated lad; but little do they know him, for, like all of Pembroke's husky N. H. C. boys, woman has no terrors for him. Besides being a connoisseur of beauty, Nat is an epicurean of faultless judgment, for he boldly and shamelessly declares his admiration for Frogs' Legs.

John Hooper Rollins, “Long Drink,” “John” Dover
Dover High
Chemical Engineering

John started his college career by annexing the high jump record and making the Glee Club. Since then he has given up his dancing class and the Glee Club in order to get Tib by the chem. course! (?) When closely questioned, John will admit that Vernon Castle has it on him and that Caruso has a greater range.

Edgar Samuel Ross, “Sol,” “Ed” Nashua
Nashua High
Chemical Engineering

Sol is noted for his pawnbroker’s sign from Newmarket to Rochester. Eddie started to be a mechanical bug, but the King found him wandering around the lab. one day and since then Sol has been creeping about the campus with a trombone in one hand and a Chem. book in the other, trying to snare another sucker into thinking that the language of chemistry is musical.

Hansel Arthur Russell, “Hubby” Lebanon
Lebanon High
Arts and Science

Hubby belongs to the noble crew of First Sergeant grafters. That band that do not sow; neither do they reap; but make out the company reports and then sit in the college club room, smoking and dreaming of those far-gone days when they, too, drilled in the ranks and were respected of their fellow-men. Hubby used to be handsome, but ever since that night when the freight refused to stop, and he had to jump, his beauty has been nil.

HERBERT AMBROSE SCRUTON, "Dinny" Dover High
Chemical Engineering

"He stooped to conquer"

"Dinny"—the angelic, cupid-eyed, blushing-cheeked, flaxen-haired, unsophisticated, debonair Mutt of Durham society, for all of Sid's prowess, ran him a close race, but neither finished because of their being stung by the same bee. Herbie gained his military bearing through three long years of conscientious endeavor as the hoodoo of Company A. Dinny has a wonderful wardrobe composed of everything that belongs to some one else; and perhaps his social success is due in part to this fact.

CLARICE HENRIETTA SHANNON, "Clarissima" Laconia High
Home Economics

"A guardian angel o'er our life presiding
Doubling our pleasures and our cares dividing"

Oh, yes—Clarice is brainy, and enjoys the distinction of being one of the very few girls to whom "King" James ever could teach any chemistry. "King" was so surprised and pleased to find a girl who could learn chem. that he presented Clarice with a diamond pendant. Clarice is a puzzle. Although an excellent confidante, she is also a merciless tease, and while people would enjoy her kind of sympathy, they stand in constant fear of her keen wit. However, it is too late for most of the Smith Hall inmates to complain. Clarice has them in her power! They can but trust to her kindness of heart and leave the rest to fate.

ALBERTA NEAL STEUERWALD, "Berta" Dover High
Home Economics

"All that's best of dark and bright
Meets in her aspect and her eyes"

Berta is very obliging, and if she were to get a commission for doing errands in Dover for the co-eds she would be driving to and from Durham each day in a "Winton Six," instead of depending upon the B. & M. or the jitney. Not only does Berta do things in Dover for the co-eds, but she also does things for her Alma Mater in the way of influencing her friends to come to N. H. C.

ΧΩ; Honor List (1), (2).
The Lord works in a mischievous way, his blunders to perform

“Steve” blew in with the rest of that Colebrook gang and registered in the forestry course. Becoming a persona-non-grata with Tommy Schoonamaker he moved his camera and mackinaw down to “Rand’s Frat” where except for tearing off the porch and pushing in a few walls, he remained in oblivion his Freshman year.

However, he aspired to a theatrical career on the Dover stage but alas, one of his classmates got ahead. Discouraged by his first attempt, he retired from the stage and all that is left is the memory and the little poem in the corner of his Mem. book beginning “I didn’t raise my boy to get a cabbage.”

JOSEPH ABRAHAM SUSSMAN, “Joe” Portsmouth High Arts and Science

Joe holds the long distance grouch record; he’s found fault with everything in college. Although the faculty have not accepted his corrections, he lives in hopes. Joe thought he wanted to be a chemiker, but the King got sick of him and kicked him out. Joe got his fame as a participant in the famous Foss-Sussman duel his Sophomore year.

WILLIAM HERVEY THOMAS, “Tommie” Durham Dow Academy Agricultural

To know the right woman is a liberal education —Elbert Hubbard.

Originally from Connecticut, he journeyed to the far north, Franconia, to be exact, where he somehow persuaded the faculty of D. A. that he knew his “stuff,” in spite of his lengthy dissertations in the class room. His specialties at N. H. have been Chemistry and women. He met his Waterloo at the church reception and since that fateful evening his life has not been his own. From 5.30 A.M. till 10 P.M., he goes back and forth seeming to take an almost human interest in the basement of Smith Hall. Tom’s favorite summer resort is Hampton beach, but he doesn’t seem to mind a little walk now and then on the country roads about Durham. His most important side-line is house parties.

CARLETON BRIGGS TIBETTS, “Tib” Somersworth
Somersworth High Chemical Engineering

A more innocent appearing Freshman than “Tib” never attended a minstrel show, but after getting into politics the fire-eater in disguise decided his next move should be along the social line. The brightness of Reed’s Ferry society was very much to his liking, but we imagine he made a mistake when he called her “Red” because now he says “I am through with women forever.”

HELEN FLORENCE TILTON Auburn
Manchester High Arts and Science

“She reads much;
She is a great observer”

There’s something about Helen’s grave, studious face that fools the profs every time. Each labors under the delusion that all her leisure hours are spent upon his own subject, and perhaps that’s why she gets her cuts excused so easily. As a matter of fact, it is notorious that, when not chasing up news items for the New Hampshire, Helen spends her time at the library, reading. Her taste in literature is varied, she takes an equal delight in the Cosmopolitan and the Psycho Analytic Review.

ABBY JEWETT TURCOTTE Laconia
Laconia High Home Economics

“How doth the busy little bee
Improve each shining hour”

How so great a quantity of energy and determination is packed into so small a body is a matter which baffles all those who know Abby. She can’t get away from that keen feeling of responsibility, even long enough to let one task slip by undone. Abby appreciates the beauties of nature more than do many of us. If there is a beautiful tint in the sky or a beautiful flower half hidden by the roadside, Abby sees it and has time to stop and admire it.

Even Hans, scientist and philosopher, is not proof against the wiles of the gentler sex. For witness, did he not transfer from Dartmouth to New Hampshire, a co-educational college; of course he might have come for the Chem. course, but—. The military is a novelty to Hans, but he likes it all, especially his battalion officers whom he would follow faithfully to battle—in hopes of getting a pot shot at them.

"Up from the meadows rich with corn, Clear on that cool September morn—"
Came Sid, and he has been coming ever since. In fact, he was a track man in the embryo, which has since developed until now he can hold his own on the half-mile with anyone. In spite of requiring an extra large sized hat, and a few other minor deformities, such as an inability to fit with the co-eds, and possessing a rather touchy disposition, Sid is a good fellow.

One of the degenerates from God's country. Still wears stripes, even in his hair. He aspires to be a second Galileo via economics. The only time he departed from the teachings of Satan, was the time he kissed his girl on the front-end of the platform at North Station. His pipe line pod developer remains a secret. He still persists in claiming that he only used one side of the road, from New Market to Durham. When Rosie plays tag, "Father Abraham" is ever-it. (Everett.)

"Those about her  
From her shall read the perfect ways of honor"

Every morning Helen, quite simply attired, strolls in to breakfast one minute before the dining-room is closed. She has become an expert in timing her actions so that she may sleep late and then, by a hair-breadth escape, slide between those fatal curtains. Her Freshman year of college was spent at Mt. Holyoke, and if you ask her how she happened to come to N. H. C., she'll give you this bit of sage advice, which has been imparted to her by an eminent authority—"Simply a matter of combining your common sense with your knowledge, my dear." Oh, yes, one more thing about Helen: she belongs to that select group of co-eds which receive frequent and bulky letters postmarked "Hanover."

"In each cheek appears a pretty dimple"

In the midst of a whirl of college activities, hard work, studies and social good times, Mary preserves the serenity and calm smile which gives her the appearance of having "nothing to do till to-morrow." Neither the thought of a chemistry prelim, or of a trip to the Dartmouth-Pennsylvania football game has power to disturb her unruffled dignity. Not that Mary is indifferent to her surroundings—in fact, she takes active interest in both glee and dramatic clubs, though we often wonder how she finds time to do so much, and at the same time pretend to do so little.

"IN MEMORIAM"

1968
REGISTRATION DAY, September 16, 1914, was our first appearance at New Hampshire College. That we were "warmly" welcomed could not be doubted after the "Minstrel Show" which was held in our honor. In the poster fight which followed, further signs of "warmth" were manifested. In spite of our efforts, a few warnings to the seemingly green Freshmen remained, and accordingly, the Class of 1917 was granted the first of the series of victories.

Some of our huskiest men discovered that the water of Oyster River is not only wet, but also extremely salty and muddy. This discovery was the result of the "Rope Pull." The class picture was also a thorough defeat for us, but we were not always to be so disappointed. In the football game, our true mettle was displayed, and we won over the Sophomores with a score of 13-0.

This victory was followed by two more, that of the basketball and baseball games, '18 winning the former by a 26-19 score, and the latter, 6-5. With the track meet which the Sophomores won by a small margin our contests as Freshmen were closed.

When our turn came to be Sophomores, we proved that we had learned from a year of experience, and we have been successful in the "Poster Fight," the "Rope Pull," and the "Picture Contest." The football game put an end to contests between the Classes of '18 and '19, and was also a glorious victory for '18.

In all the varied college activities, the Class of 1918 is well represented. Though we possess an abundance of class spirit, we cannot be too loyal to old New Hampshire. That she may long remain dear to her sons and daughters in remembrance of the training they have received from her, is the earnest wish of the Class of 1918!

History of the Class of 1919

On ONE of the hottest days of September, three short months ago, the largest class in history,—the Class of 1919,—descended upon New Hampshire College.

Conspicuously displayed here and there upon the campus, were urgent invitations to all Freshmen boys to attend the annual minstrel show in the gymnasium. Needless to say the boys accepted, and, arriving at the appointed hour, they received a "warm" welcome from the Sophomores. At nine o'clock, after the dramatic talent of each new man had been tested, the hosts of the evening bade them a hearty farewell. Disregarding the parting instructions of the Sophomores the Freshmen immediately betook themselves to Madbury Bridge where they assembled, and at eleven o'clock the march back to Durham began. Failing to locate the Sophomores, the '19 boys returned to the field back of the new dormitory where they remained until four o'clock. Then up the street came Joe Ford, driving his yellow car at 70 miles an hour. At this signal from the Sophomores, the Freshmen quickly fell in line and followed the bearer of the posters.

The two forces met in front of T. Hall and very shortly all but 12 of the Sophomores were tied firmly to the foot of the flag pole, to the top of which was nailed securely the 1919 class banner. Then began the poster scrap which ended in a theoretical victory for 1918.

At the reception given the Freshmen by the Christian Associations Sept. 19, the new students were urged to go out for as many college activities as possible.
Acting on this, the Class of 1919 has entered heartily into most of the organizations and is taking up its share of the work.

The Sophomores undoubtedly won the annual rope-pull, for at the start the lighter Freshman team was forced from its position and drawn steadily and swiftly down into the water. Although the strength of the opposing team counted so strongly against us, the elements were for us, and the Sophomores were quite as wet at the close as were the men of 1919.

The Sophomores most generously gave the Class of 1919 the credit of winning the class picture contest, as far as they themselves are concerned. However, upon investigation, the Student Council decided that there was not the required percentage in the picture and on this technicality rests the victory of the Sophomores. Sunday is not the usual day for securing a class-picture and we hope, as originality has served us once, so may it many times.

The Sophomores were victorious in the final contest, that of interclass football, with a score of 12-0.

1916 Two-Year Class Officers

President, Harold L. Eastman
Vice-President, Adna J. Cutting
Secretary, Paul B. Gay
Treasurer, William A. Megrath

History of the 1916 Two-Year Class

When the bell in Thompson Hall called the students to chapel September 16, 1914, it was found that the entering Two-Year Class consisted of seventy-six husky men direct from the farms of many sections, throughout the Granite State, who desired some training in agriculture.

In addition to striving to be good students our class has had representatives on the football team, on the track team, in the glee club, in the dramatic club, and in all kinds of social activities. We have given sturdy support to all branches of athletics, and four of our members have won the N. H.'s.

In class athletic contests we have been beaten but once, which was when the 1915 Two-Year Team took our measure in baseball to the tune of 10-2.

The class football game of 1914 was cancelled on account of snow, but in 1915 we trimmed the strong '17 class by the score of 12-6. In basketball we showed our cunning by winning from the 1915 team, by the score of 27-6.

At the beginning of the second year we followed the motto, "Do to Freshmen as you as a Freshman were done by," and thus we duly initiated the First Year Two-Year Class.

The next of our victories was the rope pull which was the first Two-Year "pull" on record. To celebrate this we made the First Year men bow down, and kiss the rope, and thus acknowledge their superiors.

Now that we have organized a Two-Year Class Picture Contest and rope pull, we sincerely hope that the future classes will continue these performances successfully. We are also glad to learn that the Two-Year Classes will be included in the Poster Contest, which will insure still greater unity between the Two- and Four-Year Classes.

This class has been loyal to its Alma Mater, and as we go out into the world we will always remember with pleasure our sojourn at New Hampshire State College.

History of the Two-Year Class of 1917

The Class of 1917, consisting of 102, 66 of whom are Two-Year Agricultural students, and 36 of whom are registered in the newly inaugurated Two-Year Course in Industrial Mechanics, is the largest Two-Year Class that ever entered New Hampshire College. Of the 102, 85 come from the hills of "Old New Hampshire," 10 from Massachusetts, 3 from Maine, and one each from the states of Connecticut, Vermont, Pennsylvania, and New York. This diverse set of ambitious youths are striving not only to better themselves, but also, their homes, their state, their country, and their Alma Mater.

Our men have given their best for the support of athletics, and our class is represented on nearly all of New Hampshire's fighting teams. The Glee Club, Orchestra, Band, and other organizations have also chosen good material from this class.

Each and every man is determined to make the most of his two short years in college, and to uphold the high standard of quality set by his predecessors.

A NEW system in athletics was inaugurated at New Hampshire this fall in the procuring of an athletic director, William H. Cowell, to be a permanent member of the faculty. Heretofore, each major sport had its own coach who was here for only a limited time. This coach, unless he had been here before, had an entirely new set of conditions to become acquainted with before the most efficient work could be done. For these reasons and in order to have an athletic instructor for all students, the present scheme was adopted.

Professor Cowell was born in Lynn but moved to Kansas, where he entered the state university in 1907. Owing to the Freshman rule in the Missouri Valley, he was not allowed to enter in the varsity competition there until his second year.

The fall of '09 and '10 he played varsity football tackle; varsity football in the spring of '10 and '11 and was on the basketball squad the same years. He left Kansas to take up work at Illinois and was there during the season of '11 and '12.
Owing to the one year residence rule in the Big Nine he was not allowed to compete in football games, but took up swimming, football, and baseball.

He entered the University of Pittsburg in '13, played varsity football and baseball, and was a member of the swimming team and boxing team. He was Assistant Coach of Haskell Indians during the year of '14 and in the spring of '15 under Coach Kennedy.

In the summer of 1915, he attended the coaching school at the University of Illinois, where he delved deep into baseball with George Huff, and battled with Zuppke, the football wizard.

He came to New Hampshire in the fall of 1915 and has already shown his value as a coach. In football he developed a team that won all of their home games, as well as the Worcester game, the big game of the year, to which a special train carried 350 rooters. In basketball two games have already been won, and the prospects are good for many more victories.

The co-eds have tattled
That Dean G— got rattled
And ate her mince pie with a spoon."

I was lying stretched at full length on the grass in front of T-Hall. The warmth and life of springtime were in the air and the row of maples along the avenue was just beginning to show green. I had come out a few moments before to listen to the boys singing some old familiar songs down by the block. They had tired of this pastime and had gone, but I still lingered.

It was twilight, and the atmosphere was such as to make a man’s blood run riot and his spirit flit away to many an unfrequented nook.

"Hi dipple dapple
King James came to chapel
Bud Fisher stopped working at noon
The co-eds have tattled
That Dean G— got rattled
And ate her mince pie with a spoon."

More than mildly interested, I turned to find from whence came this little song and who was the singer. To my great surprise there on the ledge by the flag-pole sat a jaunty little fellow, his head incased in a jester’s cap and bells, his skin-tight trunks striped with blue and white; while a tiny silver bell suspended from his toe, waggled accompaniment to his chant.

His face was old, how old I could not tell, and not a trace of a smile was written there, as he looked directly at me.

"Hello," said he.

"Hello," I returned.

"I am the spirit of the campus," said he.

"Ah," I said, becoming even more interested than before.

"Yep," said he, "been here since 1893. Gee, but that’s a long time when you stop to think of it. Before that I was up at Hanover. But I didn’t like the
place. So one day I came down to see old Ben Thompson and put the proposition before him, asking him for some land and money, so that we could have a college of our own. He gave the land willingly and some cash to help us get started and we've been going ever since. I know, for I have been here most of the time.” “I used to live with the Old Man of the Mountain,” he continued. “Dear me, it makes me feel young when I realize how long that old fellow has lived up there alone receiving the admiration of the world as it passes along at his feet. He has done lots of good, too, in his way. I wanted to do some good, too, and so I came down and helped start this college. I have grown real attached to it through the years that have passed, and I guess I'll stay.”

“Why, sir, I can well remember the day we started to build T-Hall, farmers and most everybody were interested; and the day we finished it, some prominent men were here and made speeches. I wish Ben could have come back and seen what a lot of good his money and buildings have done you fellows. Seems like some people are always doing something to help somebody.”

His reminiscent turn of mind had led him astray, but urged back to his story by my questioning look, he resumed, “Yep, we had a hard time to keep things moving for a few years; nobody had much faith in us but we stuck ‘like a puppy to a root’ as the Old Man used to say. Those legislators over in Concord kept saying that they didn't have much money for us, but we noticed that they kept giving it to Dartmouth—Oh, that reminds me, you know we got Pa Pet, Scottie, Billie Groves and Frankie Moore away from Dartmouth and they still feel a little sore at us. We can't blame them.”

“We almost trimmed Dartmouth in baseball and basketball last year and they were some scared, too. I was over in the Gym and heard them talking after the game. I am so small that they didn't notice me, but I heard one of them say that it would be an awful disgrace to be beaten by us. I bet his arm ached going up to the station, for I filled his bag with clinkers, the big rascal!”

“Oh, as I was saying, we had some job to get money enough for some new buildings, although we got them, one by one. The boys raised most all the money for the Gym themselves and had a right to feel proud of it. And then one day I sat over there just where the library now stands, and I thought, 'Oh, how I wish we could have a library to stand on the brow of this hill and beckon to those who pass along the street, to come and enjoy its treasures.' And then, as though I was Aladdin of old along came that fine man, Hamilton Smith, sat down beside me and we chatted awhile, then he said ‘This college needs a library adequate for the students and I'm going to give them one.' My, but I was happy, just seems as though I never was so happy.”

“AFTER that things went very well until they had the strike. Say, I worried a lot over that but I knew it would come out all right and it did. What's the use
of worrying over things that we can't help? I bet if we had had Prexy Fairchild then, there wouldn't have been any trouble. It just seems as though he was a boy himself sometimes, only wiser and better. He always gives the boys a square deal and doesn't get impatient even if they do act like—just natural.

"And then the way Prexy has worked getting the appropriations for DeMeritt and Fairchild halls. He has been giving his life for you, that those who come after him may profit by and enjoy the fruits of his labors."

Presently he hopped up. "Tomorrow I must go up to see The Old Man of the Mountain," he said. "I'm sure he must be expecting a visit from me." And with a jaunty toss of his head by way of parting, away he went over Bonfire Hill, his little cone cap bobbing and the tiny bell tinkling, in the twilight, and after him floated these words on the still spring air:

Old New Hampshire is victorious
   On the diamond, field and track,
Play the game, boys, play together,
   And we'll bring the vict'ry back.

N. H. men you'll always see them
   In the thickest of the fight,
They are dauntless, persevering
   And they play with all their might.

Chorus
Ring the bell in T-Hall, boys,
   Paint the town as ne'er before,
Play the game, boys, play together,
   Score once more, boys, score once more.
The Cut

The Cut is a peculiar proposition. It is the only original Monkey's Puzzle. Sam Lloyd in his balmiest days, never invented anything more tantalizing or deceptive.

To the Freshman, the Cut is a Blessing from Heaven, exceeded only by the Cut which the Prof. himself takes. To the Upper-classman, the Cut is a Snare and a Delusion, to be approached from the hind side, caught, hog-tied, and converted into Freedom at the earliest possible opportunity.

The Shark never uses his Cuts. The student uses his when he expects to be called upon to recite, something which he never did. The Grind takes his when he is so sleepy from plugging all night, that he cannot keep awake in class. The Regular Guy uses his in the cold, gray dawn of the morning after, when he knows it is no use to try and get his Head through the door of T-Hall.

For absolute viciousness and unexpected treachery the Cut stands supreme. It would take a wiser man than F. C. Moore to plot the inconceivable curves, drops, ellipses and angles which a Cut can take.

For Example. It is announced that a whole Credit Hour will be given in exchange for 15 Cuts, said Cuts to be guaranteed sound, uncancelled, and in good working order. The Student saves them carefully, counting them every day, and locking them up at night with his United Cigar Stores Coupons, and his A. A. Ticket if he has one. Only by the most heroic self-denial does he refrain from using them in the interests of Life, Liberty, and the Pursuit of Happiness, via Dover. And what is the result? Why, when this poor, innocent, unsophisticated cuss has 15 nice, new fresh Cuts all sorted out and tied up in a neat parcel, the market drops and they are worth less than a Jit Ticket in July. In despair, the weary Student goes on his next vacation a week early, scattering Cuts all over God's Creation and part of Vermont. Returning, he finds that Cuts taken a month before, after, or during a recess count double, triple, or quadruple, as the case may be. Then it is that the Commutty says to him, "Young Man, YOU ARE ON PRO! From now till July you shall neither cut classes, sleep daytimes or look at anything but a text book. You shall write nothing but notes. You shall drink nothing but pure water, spoiled by filtering through Pettee's Peerless Pumping Station. (advt.) You shall eat only brain food. You shall associate with no one but yourself. You shall not leave Durham without getting a license, and giving the Grip and Password. This is for the good of the College, and because it is my duty as Dean of this college, etc., etc., etc." Is it any wonder that an undergraduate's vocabulary equals that of Pat Cahill.

Question: What is the Cut System for, anyhow?
Answer: To raise merry Hell with a man's constitution.

From time immemorial there has been dispute as to which course is the harder; let these sample exam. papers settle it once for all.

Final Examination, Agronomy 51, January 29, 1916

Final examinations are recognized as proper and legitimate college functions. However, after certain preliminary tests, the solution of assigned problems, and the inspection of the results and the data of the required laboratory work during the semester, the instructor has a pretty definite idea as to what mark the student is entitled to, and a final exam. may not be necessary or even desirable. Not only does the instructor know the relative standing of his students, but the assumption is ventured, that each student has a pretty fair idea of the standing of every other student. Moreover, does the formal writing of an examination after a student has prepared himself for it, profit him any?

1. Do you wish to subscribe to the above doctrine?
2. Do you wish to take a formal examination in Agronomy 51? (If so, a list of questions will be provided.)
3. Give your honest estimate of the marks to which the different members of the class are entitled.

Final Examination in M. E. 53 January 29, 1916

1. From the data obtained in the experiment on the college gas engine determine thermodynamic loss in Pat’s Buick when it is running with one wheel gone and two spark plugs missing.
2. Write what you know about the advantages of railroad over steamship travel between: (a) Europe and America; (b) between the post office and T-Hall on a muddy spring day. (Answer in less than 800 words.)
3. From your general information design a steel bridge to cross Great Bay at Dover Point determining accurately to ten decimal places the shearing and crushing stresses on each rivet on the north side, and on every other rivet on the south side. (Assume the weight of the bridge as infinite and the moving load as zero.)
   Do not spend more than 23 minutes on this question.
4. From your personal experiences write what you can about the engineering prospects in Newmarket and why a roller skating rink or a dance hall is not a paying proposition there.
5. Anyone passing this exam will be examined as to whether he is a genius or just bughouse.

He must have voted for himself for each one and got no other votes. Stevens votes for himself for “handsomest.” Thomas tries to bribe the editors to leave his name out.
Ed.’s Note.—Forester Gamash handed in the following, saying, “Here’s a good one that I sprung in class that you can have for the Granite:”

Forestry 53 Class: How can you tell the Cornus Florida (Dogwood)?
Gamash: By the bark.

Bud Fisher (in slide rule lecture): “Is there anything that is not clear?”
Then spying an Aggie man in the class, “Or, perhaps, I sometimes think I should say, ‘is there anything that is clear?’”

F. E. M.: After a half-hour lecture on the calorimeter in which he discourses on politics, religion, and philosophy, but says nothing whatsoever concerning the calorimeter: “In short the principle of the calorimeter is this: If there’s no water in the steam, you get no reading for water; if there is water in the steam, you get a reading for water; that’s all there is to it.

Simmers, seeing Howe asleep in class, asks him a question:
“I don’t know,” murmured George Howe, sleepily.
Simmers thinking someone else had answered: “Are you here?”
“I don’t know,” repeated Howe in the same sleepy tone of voice.
(How near we reach the truth at times.)

In Education I, Simmers tells how some people can never learn by example or by being told, but must have their muscles forced to do the right thing before they can gain any skill in it.
Howard (Captain Co. C): “That’s right, some men can never seem to learn how to drill.”
Simmers: “Do they have a competent teacher?”

McKone, discussing systems of links: Mr. Dudley, what do we consider as stationery?
Hodgdon, after a silence from Dudley: Tell him ‘paper and pencil, you nut.’
Whereupon McKone puts the multiplication tables on the blackboard to be copied into the notebooks.

Two-Year English Class:
“How many f’s in Philadelphia?”
“How many t’s in much?”
“I saw ‘Julius Caesar’ in the movies yesterday. It would make a great book of someone could only write it.
“There ain’t no use in us taking this stuff. We done our grammar in high school all right.”

Engineering English:
Dudley, pointing to blue print form of title box: “Did you pinch my one of those?”
Dogmatic Doggerel

There is a prof in our town,
   And he is wondrous wise;
His lack of dogmatism
   Has caused us much surprise,
For stern determination lurks
   Within his deep-set eyes.

Such store of wisdom we’ve acquired,
   You’ll surely all agree;
And when we graduate from here,
   No doubt we all shall be
Most earnest, full-fledged students
   Of chick activity.

A Predicament

Oh, Nellie G——, what shall we do?
For we all want to be like you.
We came to N. H. C. to be like you if we can,
We do not care for social life, we cannot stand a man.
Oh, Nellie G——, it’s up to you,
So give us the answer, kindly do.
To be like you we’re yearning,
For this our hearts are burning,
Nellie, Nellie, tell us what to do.

A New Version

I didn’t raise my boy to get a cabbage,
   I brought him up to act in Men and Mice;
Who dares to heave a cabbage at his shoulder,
   I do not think that’s acting very nice.
If Alpha Zeta caused Steve’s mean career,
   It’s time the President should interfere.
There’d be no play to-day, if the Woman’s League would say,
   I didn’t raise my boy to get a cabbage.
The Tragedy

A little Protozoa once
Was placed upon a slide.
"With my location now," said he,
"I'm deeply satisfied."
But as he wiggled joyously,
And with contentment sighed,
String Beane applied the acid test—
That Protozoa died.

Heaven

Now it came to pass that in the course of time the editors and business managers of the Granite died and went to Heaven. And lo, there were many strange faces and the little band grew lonesome and heart-hungry for the sight of the old forms and faces they knew so well, for somehow heaven didn’t seem right, something seemed missing. Accordingly, they entreated St. Peter to let them see their old friends. One bright day when business was slack the guardian of the Golden Gate left it in charge of Arch-Angel Taylor, who was one of the trustees, and sailed away with the Granite Board to find the nether regions. Tipping the Porter at the gate they passed on through the corridors of the damned, until the heat and atmosphere punished them nearly as much as it did the lost souls. On the way they passed plates bearing the legend, miser, murderer, thief, etc., indicating the crime of the persons incarcerated in the pit. At the very end they found a plate with the inscription “Those that didn’t buy a Granite.” With a sigh of contentment the Board sat down in a circle around the pit with the above plate, satisfied at last. Their quest was ended; that which was missing in heaven was found. And there, despite the entreaties of St. Peter, they spent eternity; happy to the end.

“The Freight That Didn’t Stop”

or

“How Hubbie Lost His Good Looks”

As the twelfth stroke of T-Hall bell dies away on the crisp midnight air, the midnight freight goes flying by the depot, 60 miles an hour, on its way to Boston. In the pale moonlight, two figures are seen clinging to the end of a freight car. The train passes and all is still once more. A few aeons later two forms come limping up the track from the direction of Newmarket. Suppressing a groan one turned to his companion and said, “Where did you get off, Hubbie?” With a sigh that told of a body in mortal anguish, Hubbie pointed up and down the track and answered, “Oh, all along here.”

Moral—Now ever since that dire day that gave poor Hubbie pain, When coming home from Dover, he never jumps a train.
Government Scandal at Portsmouth

Attempted Bribery of High Official at Navy Yard—N. H. C. Junior Implicated in Matter

It all happened on the day the Junior Engineers visited the Navy Yard. The trip had been made from Durham in automobiles, except for Hodgdon who came down on his motor-cycle, and at every turn of the road, it seemed, a toll-bridge was at hand to take a few more pennies from the riders. Everything went off surprisingly well, even at dinner; for Parnell had been persuaded not to order soup, and Burleigh's knife had been taken away from him, so that he couldn't eat with it. But the hopes of the party for a successful day were destined to be dashed. When they were ready to leave the Yard they were stopped by a sentry who started to inquire their business. Before he could speak, however, Hodgdon whipped out his pocketbook and began to peel off a bill, thinking it was another toll bridge. Through Frisbee's pull in the Navy Yard, Hodgdon was saved from being court-martialed for attempted bribery of a government official, and thus a scandal was narrowly averted.
